Denver, CO 80203

Solstice Electrical & Controls is three divisions in one company: electrical contracting, automation and controls, and a panel shop with drafting. Hire one, or all three on the same job. You work directly with the manager of the division doing your job, from the first call to startup.

DIVISIONS

01 ELECTRICAL Brett Denker, Electrical Manager

- **Residential, commercial, industrial and agricultural** electrical work
- **Power distribution:** services, switchboards, panelboards, transformers and service upgrades
- **Service calls:** troubleshooting, repairs and maintenance

02 AUTOMATION & CONTROLS Cody McGuire, Automation & Controls Manager

- **PLC programming:** Allen-Bradley (Studio 5000) specialty; Siemens, AutomationDirect, Omron and others
- **HMI & SCADA:** Raylux (our own) and Ignition first; FactoryTalk, Weintek and others
- **Alarms & remote access:** ISA-18.2 alarming, mobile screens, text and email notification
- **Drives & motor control:** ABB and Allen-Bradley VFDs over EtherNet/IP, soft starters, E300 overloads
- **Commissioning, upgrades and migrations**

03 PANEL SHOP & DRAFTING Pattama McGuire, Panel Shop & Drafting Manager

- **Panels built in our own shop:** PLC, motor control, VFD, pump and lift station, skid and replacement panels
- **Drafting:** schematics, panel layouts, wire lists, bills of material and as-builts, with a panel or on their own

WHY SOLSTICE

You work with the people doing the work.

No sales desk and no call center. The manager of the division doing your job is who you talk to, from the first call to startup.

Electrical and controls, one company

Nothing falls in the gap between two contracts and two schedules.

Screens operators can read

Grey graphics built to ISA-101, so problems stand out.

Tested before it ships

PLC and HMI code runs against a simulation first, so startup is checkout.

Our own SCADA platform

Raylux scales from one pump station to a full plant, every driver in the box (rayluxscada.com).

INDUSTRIES SERVED

Water and wastewater · Food and dairy processing · Agriculture · Manufacturing · Industrial heating and HVAC · Process skids · Commercial buildings · Residential

HOW WE WORK

1 Design

Specs, schematics, panel layouts and BOM

2 Build

Shop fabrication, labeling and a full wire-check

3 Program

PLC, HMI and SCADA, run against a simulation

4 Commission

Startup, I/O checkout, training and as-builts
